

Valley of the Damned

DragonForce

On a cold dark winter night
Hidden by the stormy light
A battle rages for the right
For what will become In the valley of the damned
A warrior with sword in hand
Travels fast across the land
For freedom he rides And the sign from the master on high
He screams aloud and across hear the cry
For the kingdom of fire and ice
And the power to be alive Be strong and ride on
Carry on through the war
Come along carry on
Living for ever more On the wings of death
By the hands of doom
By the darkest light
From the darkest moon Crossin' silent seas
Over mountains high
For we stand as one tonight On the black wind forever
We ride on together
Destroying' your evil
With freedom our guide When the master will call us
He'll stand high before us
Our hearts filled with splendor
Our swords will shine over the light In the valley of the damned
Days breaks with golden strand
Over pastures green it glows
To where night returns In the shadows faces appear
Warriors wearin' full metal gear
Join together one
And all before the glorious light Rise up, gather around
Come and hear what is said
Use your senses open your mind
Don't you ever forget On the wings of life
By the hands of hope
By the brightest light
From the brightest sun Crossin' silent seas
Over mountains high
To the valley of the damned On the black wind forever
We ride on together

Destroying' your evil
With freedom our guideWhen the master will call us
He'll stand high before us
Our hearts filled with splendor
Our swords will shine over the lightOn the black wind forever
We ride on together
Destroying' your evil
With freedom our guideWhen the master will call us
He'll stand high before us
Our hearts filled with splendor
Our swords will shine over the lightOn the black wind forever
We ride on together
Destroying' your evil
With freedom our guideWhen the master will call us
He'll stand high before us
Our hearts filled with splendor
Our swords will shine over the light
