

What You Need

Usher

It's sterile

Let's get it

You S, you know what we do

Let's get it, let's get it, let's get it I pull up at the light and see you looking my way

I lay back in my seat and think of some pimp shit to say

It's been a while since one look, made me feel this way

And I don't intend to let you go, no And baby I can't wait

To show you all around the world

Oh girl, oh girl

I've got, I've got what you need Baby, I can give you every thing that you need

Just trust your man and let me, do me, baby

I wanna take you places you only see on TV

Oh girl, I got just what you need I gotta make a move before the light tries to change

Let down my window and tell you to just follow me

I know you wanna come but you seem a little afraid

Trust me, said, "I promise I won't hurt you baby" And baby I can't wait to show you all around the world, oh girl

And baby I can't wait to show you all around the world

Ooh girl, oh girl

I've got, I've got what you need Baby, I can give you every thing that you need

Just trust your man and let me, do me, baby

I wanna take you places you only see on TV

Oh girl, I've got just what you need Baby, I can give you every thing that you need

Just trust your man and let me, do me, baby

I wanna take you places you only see on TV

Oh girl, I've got just what you need See right about now

We gonna take y'all to D.C., Chocolate city

We gonna set it out southeast style

Like my main man Chuck Brown used to do Ooh la la la, ooh la la la

Ooh la la la, ooh la la la

Ooh la la la, ooh la la la

Come on, ooh la la la, ooh la la la What you need, baby, I can give you every thing that you need

Just trust your man and let me, do me, baby

I wanna take you places you only see on TV

Oh girl, I've got just what you need
