Like Yesterday

Monophonics

I remember like yesterday
I carried a heart without hope
I'd given up on mystery
I only saw mirrors and smoke
Thought I was fine alone
It's just because I didn't know
I remember like yesterday
Loving you seemed far away
We were friends in different places
Then love began leaving traces
Sitting with you on a crowded bus
Seemed like just the two of us
That night everything was changed
I remember like yesterday
I was living in black and white
A careful and colourless life
You are like a neon light
Shining through my closed eyes
All the right ones, they turned out wrong
But you were here all along
I remember like yesterday
Loving you seemed far away
We were friends in different places

Then love began leaving traces
Little folded up love letters
Sweet songs written for each other
Everything was about to change
I remember like yesterday
You came just in time for me
Changed my mind so easily
Now it's you and me
I remember like yesterday
Loving you seemed far away
We were friends in different places
Then love began leaving traces
For the first time, I love you
On a Paris afternoon
And now everything has changed

I remember like yesterday
I remember like yesterday
Loving you seemed far away
Thought I could live without you
So glad I finally found you
On the street in the pouring rain
Our lives both found their wings
I love how everything changed
I remember 'cause it's today
