The Grey Wolves

So tell me is it right?
To feel like we're only getting smaller
And if we were to find the feeling
But I'm only treading water
We've made a few mistakes
It's not worth it to say
(We are far from their doubt)
'Cause we are the only ones and we will get up
And we are aware 'cause we've been through it
And we are the only ones
We will carry each other on our own
Bleed the sound
When the truth will send you falling
You feed the lies but your mind isn't open
Now I hear you calling
We've made a few mistakes
It's not worth it to say
(We are far from their doubt)
'Cause we are the only ones and we will get up
And we are aware 'cause we've been through it
And we are the only ones
We will carry each other on our own
Open your eyes and let all the light in
Open your eyes up a little more
And show your bliss, and come out
'Cause we are the only ones and we will get up
And we are aware 'cause we've been through it
And we are the only ones
And we will carry each other on our own
Open your eyes and let all the light in
Open your eyes up a little more
And show your bliss, and come out
