

Smfu (Save Me from U)

Dawn Richard

It's a mystery how no ones figured you out
When it gets too deep you just let me drown yeaa
Who needs an enemy when the one you love is tearing you down ohh
And dragging you into the ground
I'm tired of waiting
I'm tired of calling
Only for you to let me down
My heart is aching no more tears falling, from here on out I made a vow
I don't need no
I don't need no rescue for the falling plane
Save me from a building burning up in flames
So baby before you go put on your cape
Save me from you
Don't know the man behind the mask identity
Cause your the only hero I know that can be
Saving everyone but keep on hurting me
Save me from you My heart is on my sleeve every time you come around
When you have the key
You choose to shut me out
How can you be superman with the s on your chest
When every time I need you first I seem to always be last
My bat signals in the sky still you're nowhere to be found
I am tired on waiting
I am tired of calling
Only for you to let me down
My heart is aching no more tears falling, from here on out I made a vow
I don't need no
I don't need no rescue from a falling plane
Save me from a building burning up in flames
So baby before you go put on your cape
Save me from you
Don't know the man behind the mask identity
Cause your the only hero I know that can be
Saving everyone but keep on hurting me
Save me from you I don't need your protection from danger
I don't need you to shield from harm
I don't need you to save me from a robbery
When you are the one whose stolen my heart
Dont need you to save my ship from a glacier

when you are the one breaking us apart
I don't need you to come and save the day
Just save it from your own
I don't need no rescue for the falling plane
Save me from a building burning up in flames
So baby before you go put on your cape
Save me from you
Don't know the man behind the mask identity
Cause your the only hero I know that can be
Saving everyone but keep on hurting me
Save me from you Is a mystery how no ones figured you out
