Burn Out Your Flame

Ingram Hill

They're comin' around just to give a new plan
They say that it's done, better leave while you can
Well fallin' apart never did much good
But how will it feel when they're over you
So when failure looks you in the eye
And there's nowhere left to run and hide
And all you've got is what's inside
Never matters who you blame
Lose it and you'll feel the same
Don't let them burn out your flame
Hopin' that there's gonna be a new start
Learnin' that words won't get you too far
It wasn't too long when you were on your way

But wait anymore, it'll be too late
So when failure looks you in the eye
And there's nowhere left to run and hide
And all you've got is what's inside
Never matters who you blame
Lose it and you'll feel the same
Don't let them burn out your flame
So with failure staring in my eyes
And nowhere left for me to hide
I'm scared I'm runnin' out of time
It never matters who you blame
You lose it and you'll feel the same
Don't let them burn out your flame
