

Hey (Extended Mix)

KING

Hey, I know how it will end 'cuz it's already been told
Happily after only happens in fairytales, daydreams or never
But I wished hard on the stars Now here you are
Shining through the sky, light in my dark
Even stars burn out but you held the spark
Now here you are to stay Hey, it's true
You were made for me, and I you
Beyond cloud nine
Higher than high past the sky where I'll find
Not too far, in the stars That's where you are
Shining through the sky, light in my dark
Even stars burn out but you held the spark
Here in my heart you'll stay [Bridge Harmonies] Hey you are
What I wished for when I saw that shooting star (2x) Yes, you are
Yes, you are Hey you are
What I wished for when I saw that shooting star (2x)
