

# Hydrogenuine

## USS (Ubiquitous Synergy Seeker)

There must be solar systems in your eyes  
Cause they sparkle like exploding stars when you smile  
Care to play a game? This experiment has chemically altered my brain  
And could this be love? Could this be love at my door?  
Eleven is the number I seem assigned to  
Inversions of an opposite truth aligns you  
Directions like the back of your hand will guide you  
I am simply here to assist and remind you  
Worked out an algorithm that defines  
The most effective way our data is sure to entwine  
And could this be love? Could this be love at my door?  
Eleven is the number I seem assigned to  
Inversions of an opposite truth aligns you  
Directions like the back of your hand will guide you  
I am simply here to assist and remind you  
Hyperactivity is linked to low magnesium  
I'd love a flower but the nice one's all got bees in em'  
A freak of nurture playing twister in Elysium  
Hydrogen Helium Lithium Beryllium  
And could this be love? Eleven is the number I seem assigned to  
Inversions of an opposite truth aligns you  
Directions like the back of your hand will guide you  
I am simply here to assist and remind you  
Spectrums of K-Paxian light will guide you  
The super-glue of unicorn hearts will bind you
