Outside

Supergrass

Outside in the darkness
There's something happening here
Outside in the darkness
Speeding out through the universeHot fear and a heartbeat
Standing face to face
Red light in the distance
It's getting cold and the air is running outOutside in the darkness
There could be nothing for days
Outside in the darkness
I can hear the devil walk aboutFlying over the rock face
And over cities in flames
Red light in the distance
It's getting cold and the air is running outIts on my TV screen
I'm not a static machine, ohIts on my TV screen
I'm not a static machine, ohIts on my TV screen
I'm not a static machine, oh
