

While You're Away

The Letter Black

While You're Away I've got plans to take you down
Privately we'll make a time
Taking notes and making charts
One machine to map the heart Silver lining in your mind
Look inside but never find
Hanging pictures on the wall
While you're thinking how you left all While you're away
With stars in your eyes
The infection is so close to the heart
Give me some time
It's all that I need
You lie beside your dreams in the dark Please pick up the phone
I picture you asleep
And you're alone
You're listening to the sound
Of your inside
It's never been so sweet or so alive While you're away
With stars in your eyes
The infection is so close to the heart
Give me some time
It's all that I need
You lie beside your dreams in the dark Give me some time
It's all that I need
Give me some time
It's all I need Give me some time
It's all that I need
Give me some time
It's all that I need
Give me some time
It's all that I need
Give me some time
It's all that I need
