Yellow Light

Remy Zero

Hey I can't get my head straight
Of words we're twenty blocks too late
Now the devil is in my face
She seems to be looking down
And hey, have you heard about Mr.Crow?
Well I think so but I don't know
Well you can't let your panic show
My bones is beginning to shake
Reach out your hollow flame
Oh you're hangin' so weird and strange
Oh your darkest days
They're just beginning now
And hey got to move all across this thing
As the moon has made everything mean
Now it tears apart my brain
My bones is beginning to shake
Reach out your hollow flame
Oh you're hangin' so weird and strange
Oh your darkest days
They're just beginning now
Come and leave somehow
Lights to the world, the sun is rising
From the moon and the earth to the stars
Simple wings are simply pulled apart
My bones is beginning to shake
Reach out your hollow flame
Oh you're hangin' so weird and strange
Oh your brightest days
They're just ending oh no
Your darkest days
They're just beginning now oh
