Hey There Hi Hello

Anttix

La la la la la la
La la la la la la
La la la la la la
La la la la la la
Looking at the stars
A million miles away
We're not so different
We're both just too thin
For this time in space
Try to find a reason
Trying to find a rhyme
Changing like the seasons
Constant like the tides

You know that loneliness is just a state of mind
Cause I'm a friend of yours and you're a friend of mine
And when you need a helping hand I'll help you fly
Until we reach the highest height
We got one life to fight the fight
One chance to get it right
Listening to all the crazy things that other people say
None of it's going to matter they'll just keep on talking anyway
Slow down count to ten
Kisses now and that was then?
We've all been there when it's not fair you know
Hey there hi hello
Hey there hi hello

Sometimes we need a sign
Someone to guide the way
To take our hand
And make us stand
And tell us that it's ok
You're beautiful perfection don't give it all away
Don't listen to a word they say because

You know that loneliness is just a state of mind

Cause I'm a friend of yours and you're a friend of mine
And when you need a helping hand I'll help you fly
Until we reach the highest height
We got one life to fight the fight
One chance to get it right
Listening to all the crazy things that other people say
None of it's going to matter they'll just keep on talking anyway
Slow down count to ten
Kisses now and that was then
We've all been there when it's not fair you know
Hey there hi hello

La la la la la la
La la la la la la
La la la la la la
La la la la la la
La la la la la la
La la la la la la
La la la la la la
La la la la la la

We got one life to fight the fight
One chance to get it right
Listening to all the crazy things that other people say
None of it's going to matter they'll just keep on talking anyway
Slow down count to ten
Kisses now and that was then
We've all been there when it's not fair you know
Hey there hi hello
(La la la la la la)
Hey there hi hello
(La la la la la la)
Hey there hi hello
(La la la la la la)
Hey there hi hello
(La la la la la la)
Hey there hi hello
(La la la la la la)
