One Love

Safe-Mode

Heartbroken for life...
Every night is getting harder...
To wake up all alone,
That I never can get used to...

Help to improve
What's left of me.
To redeem myself,
Who cares about me now?
No one else to hold on,
Throw myself unto.
Let me be the one to change my weight,
Don't let me forget...

There was only one for me,
But now you're gone forever...
There was only one to love...
How can I live to see this through?
There was only one to blame,
Peculiar,
I feel the same...

Heartbroken for life...
Every night is getting harder...
To wake up all alone,
That I never can get used to...
And I remember it all...

There was only one for me,
But now you're gone forever...
There was only one to love...
How can I live to see this through?
There was only one to blame,
Peculiar,
I feel the same...

There was only one to blame...
How can I ever feel the same?
There was only one for me,
But now I'm lost forever...

There was only one to blame...
How can I ever feel the same?
There was only one to blame...
How can I ever feel the same?
There was only for me,
But now I'm lost forever...

There was only one for me,
But now your gone forever...
There was only one to love...
How can I live to see this through?
There was only one to blame,
Peculiar,
I feel the same...
