

Fire in Your Eyes

Middle Kids

Help me man and tell me where you want to go
I've got some idea but I'm not in control
And all I've got is time so let me know
You've got stories yeah I want to hear them all
And I've got some but I don't think you want to know
Let's just sit and wait to see it unfold And I can see the fire in your eyes
Just like when it makes me come alive
So let me feel the fire in your eyes
'Cos I'm sick and tired of being cold Stop [?] I am going overboard
My heart's big and I just want to give it all
It slips out and I'm left feeling small
You've got theories yeah I want to hear them all
And I've got some but honestly they're full of holes
Let's just kiss and maybe they'll be solved
And I can see the fire in your eyes
Just like when it makes me come alive
So let me feel the fire in your eyes
'Cos I'm sick and tired of being cold
We can build a castle in the sky
We're looking at the sunrise in the eye
Let me feel the fire in your eyes
'Cos I'm sick and tired of being alone I just want to be
La la la la la
La la la la la
La la la la la Oh la la la la la And I can see the fire in your eyes
Just like when it makes me come alive
So let me feel the fire in your eyes
'Cos I'm sick and tired of being cold
We can build a castle in the sky
We're looking at the sunrise in the eye
Let me see the fire in your eyes
'Cos I'm sick and tired of being alone
