

# Closer to the Stars

## Soul Asylum

Advisory - the following lyrics contain explicit language:

Caterpillar crawling up the big phone pole  
Is there somebody that you want to talk to?  
You know that pretty soon you'll be able to fly  
How is this going to affect you? Do you think it might wreck you?  
Your friends might reject you Say you took it too far  
You said you want to be, you want to be  
You want to be, you want to be Hooked on glossy pictures and drugs I've never seen  
Treat you with advice from a fashion magazine  
One day she just walked into that magazine  
I wonder if she'll ever come back And they all said she would crack  
They said her mind was one track Said she took it too far  
You said you want to be, you want to be  
You want to be, you want to be  
Closer to the stars Every time you move your lips  
Let me give you a few tips  
Yesterday you were too young  
Tomorrow you will be too old To regret all the things you've done who're you trying to hustle  
Somebody you wanna show your muscle?  
Second hand excuses never went too far  
What's this scene you're making? Your ideas have been taken  
We'll seek when you awaken alone in someone's car  
You just stood there shaking, stood there shaking  
They said you were faking You said you want to be, you want to be  
You want to be, you want to be  
Closer to the stars  
Closer to the stars
