

Reach for the Skies

[Eric Steckel](#)

lightning in a summer sky
found another place to hide
no one understands this fight
rolling toast the morning light
reach for the skies
you've only for yourself
don't close your eyes
you made me say the thing
reach for the skies
you've only for yourself
don't close your eyes
while you're reaching for the sky
miles and miles of empty r
never know until we try
forty thousand feet we fly
reach for the skies
you've only for yourself
don't close your eyes
you made me say the thing
reach for the skies
you've only for yourself
don't close your eyes
while you're reaching for the sky
