Want

[Set It Off](#)

It's like drivin' with the headlights out
Gone too fast and we can't slow down
Drinkin' 'cause we know it's wrong drink until it's right yeah
It's like drivin' with the headlights outSo cordial so stable
So sure but so confused
Too selfish too lonely
Too hard to face the truth
I gotta sayBefore the damage is done
Before you take what you want
Before I take too long
This isn't what I really want
Before the damage is done
Before you're callin' it love
Before I break your heart
This isn't what I really wantWant want want
This isn't what I really wantIt's like swimming with a ten ton weight
Start to struggle but you know your fate
There's no need to kill the lights it's obvious you're blind
Well I guess I found another way to lieSo cordial so stable
So sure but so confused
Too selfish too lonely
Too hard to face the truth
I gotta sayBefore the damage is done
Before you take what you want
Before I take too long
This isn't what I really want
Before the damage is done
Before you're callin' it love
Before I break your heart
This isn't what I really wantSo cordial so stable
So sure but so confused
Too selfish too lonely
But I but I can't commit to youBefore the damage is done
Before you take what you want
Before I take too long
This isn't what I really want
Before the damage is done
Before you're callin' it love
Before I break your heart

This isn't what I really want
