Royal Crown

Stee

I never knew I could, fall for you and you for me yeah
I never knew my heart could, feel this way you hold the key
On this throne
With you I feel victory, no subjects to please don't wanna do it
On my own
So come rule with me, and together we

Can take over, over the world together and you'll be my light
You and me, we ride or die all of our lives
Girl put on this crown, let's put it down
No turning around
Babe just come with me, and you'll see what we both could be together
With this royal crown

No more waiting, the time is now it's just the beginning
Life could be beautiful, queen and king, you and I, oh
On this throne
With you I feel victory, no subjects to please don't wanna do it
On my own
So come rule with me, and together we

Can take over, over the world together and you'll be my light
You and me, we ride or die all of our lives
Girl put on this crown, let's put it down
No turning around
Babe just come with me, and you'll see what we both could be together
With this royal crown

What if I told you, nothing would be the same
The bond we share, is true
What if I showed you, what life could be with me
You would never, ever have to, look for another
Because we

Can take over, over the world together and you'll be my light
You and me, we ride or die all of our lives
Girl put on this crown, let's put it down
No turning around
Babe just come with me, and you'll see what we both could be together

With this royal crown

We'll take over (You'll be my light)
You and me, oh wo wo wo baby
Girl put on this crown, let's put it down
No turning around
Babe just come with me, and you'll see what we both could be together
With this royal crown
