Big Mouth

Gorilla Biscuits

Friendship- To you it means nothing Time and Time Again you betray friends With lies- and your gossip The stories you tell can hurt like hell It's your big mouth and it's getting on my nerves you know I wish you'd just shut it up. It's your big mouth and the shit that comes out has nothing to do with what your talking about You know I want to trust you but I can't Your word's not given, it's lent. My advice to youis to start somewhere why don't you shut the up now-It's your big mouth and it's getting on my nerves you know I wish you'd just shut it up. It's your big mouth and the shit that comes out has nothing to do with what you're talking about
