

# '85 Radio Special Thank You

## They Might Be Giants

Hello

They Might Be Giants are happy to be on a radio program  
For the first time in their long-illustrious careers  
1985 has been a very good year for They Might Be Giants  
In January, Bill began at a new school  
Everyone liked him, and he likes everything  
In March, we were all trapped deep inside a subway car  
Racing down tracks going faster and much faster  
Until they never let us out a full ten blocks later  
In April, we all sang a duet with Tina Turner  
In a way it was nice, and it was our favorite song  
But we spent the entire summer resting up  
Looking for some vital link missing in the big picture  
Bill said he had found it, but in fact he had lost it  
Well, in September Bill chipped a tooth skyriding  
Far above the Planet Earth and then came the end of the year  
When we were on our very last radio show  
Which we are glad that you have become a part of
