

All Because of You

Blackmore's Night

Is this happening? Is this fantasy? Never did I believe
There could be such happiness
Feels like nothing on earth
Started with one little kiss I could stay in this moment forever
I could reach every star in the sky
I could lose myself when I look
Into your eyes Is this happening? Is this fantasy?
All my dreams coming true
All because of you
I can't believe its true
All because of you You are everything I
Wanted for so many years
Goodbye long, lonely nights
Sadness and thousands of tears I could stay in this moment forever
I could reach every star in the sky
I could lose myself when I look
Into your eyes Is this happening? Is this fantasy?
All my dreams coming true All because of you
I can't believe its true all because of you Is this happening? Is this fantasy?
All my dreams coming true All because of you
I can't believe its true all because of you
All because of you
All because of you
All because of you
All because of you
