The Real Thing

Gwen Stefani

I've seen your face a thousand times

Have all your stories memorized

I've kissed your lips a million ways

But I still love to have you aroundI've held you too many times to count

I think I know you inside out

And we're together most days

But I still love to have you aroundAnd you're the one I want

And it's not just a phase

And you're the one I trust

Our love is the real thingDon't go away

My love, my love

I want you to stay

In my life

Don't go away

My lover, my love

I'm happiest when we spend timeYou're a salty water, ocean wave

You knock me down, you kiss my face

I know the storms will always come

But I still love to have you aroundAnd Heaven knows what will come next

So emotional, you're so complex

A roller coaster built to crash

But I still love to have you around You're the one I want

And it's not just a phase

And you're the one I trust

Our love is the real thingDon't go away

My love, my love

I want you to stay

In my life

Don't go away

My lover, my love

I'm happiest when we spend time

(It's only you and I)

It's only you and IIt's you there when I close my eyes

And you in the morning

I never thought you'd still be mine

Or I'd really need to have you aroundDon't go away

My love, my love

I want you to stay

In my life

Don't go away
My lover, my love
I need you, you're my love supplyDon't go away
My love, you're my love supply
I want you to stay
In my life, every day, every night
Don't go away
My lover, you're my love supply
I need you, you're my love supply
