

# All the Same

## All New Atmosphere

Stop, you're getting too close,  
You have to view the picture clearly as a whole  
You're getting to close  
You're only focused on what's least important  
Ignore our spectrums of light they don't mean anything  
And there's no reason to fight  
When we all stand for something more You always try to make me think that there's a difference  
When really we are all the same  
We are all the same You view us all in ranking  
And you think of yourself as in the lead  
I knew I saw this coming when you went blind  
When you went blind to everything we are  
Ignore the blade of your knife  
If you want to go as far as me  
And there's a reason to life  
When we all stand for something more You always try to make me think that there's a difference  
When really we are all the same  
We are all the same Our lives are written on our hands  
I'll help you read between the lines  
Until you give your eyes the chance  
To show you how to grow inside  
And then you'll stand for something more You always try to make me think that there's a difference  
When really we are all the same  
We are all the same
