Lovestory

Soma Sonic

Do you know everything about love?

Where it comes from and where it goes? How it pierces your veins and flows in and out of you

How it expands your soul, your heart and life. Look at this little one

You've released a love story, a love story It feels so great, it feels so good Away, away Do you know everything about love

Look at this little one You've released a love story, a love story, a love story
