

(i Just Want It) To Be Over

[Keyshia Cole](#)

Over and over
Krucial Keys, Keyshia Cole
It's the way it is
Baby, I remember
A time when we were so secure but
Now it's like December
When you say that I'm so insecure and
I gotta get away 'cause you're making me weak
It's keeping me trapped
(Keeping me trapped)
I gotta be a fool
Sittin' here tryna get that old thing back, oh
(Thing back, oh)
You use to keep your word
Was one who always did what you said
You use to speak to me so sweet
With something caring to say
Oh, you don't even try no more
Oh, you don't even care no more
I don't wanna love you, don't wanna need you
Just wanna leave you
(I swear)
I just want it to be over
(I just want it to be over)
I just want it to be over
It's like I hate to love you
A charade we play time after time
(Time after time)
It's like you love to see me
Confused and a mess I'm losing my mind
(I'm losing my mind)
I gotta get away, 'cause you're making me weak
It's keeping me trapped
(Keeping me trapped)
I gotta be a fool
Sittin' here tryna get that old thing back, oh
(Thing back, oh)
You use to keep your word
Was one who always did what you said

You use to speak to me so sweet
With something caring to say
Oh, you don't even try no more
Oh, why you don't care no more
I don't wanna love you, don't wanna need you
Just wanna leave you
(I swear)
I just want it to be over
(I just want it to be over)
I just want it to be over
No, I don't wanna hear it no more
All the lies, oh
You, you, you used to
You use to keep your word
Was one who always did what you said
(Baby, you cared)
You use to speak to me so sweet
(So sweet)
With something caring to say
Oh, you don't even try no more
Oh, why you don't care no more
I don't wanna love you
(I don't)
Don't wanna need you
(No)
Just wanna leave you
(I wanna, I swear)
I just want it to be over
(I just want it to be over)
I just want it to be over
I don't wanna love you
Don't wanna need you
Just wanna leave you
(Don't wanna, I swear)
I just want it to be over
(I just want it to be over, yeah)
I just want it to be over
(Can it be over?)
Over and over
