

Lovers in the Parking Lot

Solange

Left your heart behind when I laid eyes and said I'm up and done
The young just live and don't look back or wait for anyone
And maybe you loved me but I just up and wanted to run
Back and forth behind and down when you were in and I was out
Me chasing lovers in the front line of the parking lot
And baby I loved you, but I was not done having my fun
Played around with your heart, now I'm laying around
in the dark
Played around with your heart, now I'm paying when we're apart, yeah
Played around with your heart, (Played around with your heart)
Guess I played myself from the start
Played around with your heart Where oh where's the man that landed in my hands when I say fall?
I pushed you head over my heels until I pushed you far
And maybe I need you, but you just don't want nothing at all
Back and forth, behind and down, when you were in, and I was out
You chasing lovers in the front part of the parking lot
And baby I'd tell you but you won't give the number to call
I played around with your heart, now I'm playing
around in the dark
Played around with your heart, (Played around with your heart)
Now I'm paying when we're apart, yeah
Played around with your heart (Played around with your heart)
Guessed I played myself from the start
Played around with your heart
I want you back
You back, you back, you back
I've been playing around with your heart too long
And I now I played around and got caught
And now I play myself in the dark Oh baby I've played around with your heart
And now I'm playing around in the dark Played around with your heart (Played around with your heart)
Now I'm paying when we're away apart, yeah
Oh baby now I played around with your heart (Played around with your heart)
I guess I played myself from the start
Played around with your heart
