

20TH Century

Brad

We found the groove
Have a good time
Make sure your seat belts are fastened My friends Well, Im swearing to God, yeah, Im so nervous
I can not feel anything, save the tips of my fingers
Whenever comes just might not be the moment
Raise the roof, yeah, lets get out of this My friends
20th century
My friends
My friends Pay attention yall to the signs
Pay attention, yeah, to the questions
Let the energy rise to the moment
Yeah, that look in your eyes, no description My friends
20th century
My friends
20th century My friends
20th century
My friends
My friends Just a little bit farther
Just a little bit farther
Just a little bit farther My friends Just a little bit farther
Just a little bit farther
Just a little bit farther My friends, yeah
Yeah, oh Just a little bit farther
Just a little bit farther
Just a little bit farther My friends 20th century Just a little bit farther
Just a little bit farther
Just a little bit farther My friends
My friends
