

Perfect Chemistry

Nevertheless

I haven't reached perfection
But is that what she needs?
I haven't reached the wisdom
That she should always heed And I, I'm just a man
I haven't died for her
But I would
I'll do whatever I have to I may not be her perfect chemistry
But if I can love her like you do
It's all she needs I haven't found the remedy
For every tear she'll cry
But I'll try to be the one who's by her side
