

Money & Dealers

Flickerstick

I said I'm on, I'm on
But I'm running on empty, yeah
You got me running but you're way too far
I'm on the road, oh
I want you to catch me
So why you tell me that it's nothing at all
Oh, I want you to catch me
But I know you're gone way too far
You got the money, but the money is wasted
You got the dealers, so now you don't fake it
I'll be there when you're running around
You gotta see it all before it comes down
You gotta see it all before it comes down
I said it's up, it's down, but you're never on that beat
And now you're thinking that you're way too cool
But I'm on the road, oh I want you to search me
So now you got me, what are you gonna do?
Oh I want you to search me....
You got the money, but the money is wasted
You got the dealers, so now you don't fake it
I'll be there when you're running around
You gotta see it all before it comes down

You got the money, but the money is wasted
You got the dealers, so now you don't fake it
I'll be there when you're running around
You gotta see it all before it comes down
You gotta see it all before it comes down
You gotta see it all before it comes down
You gotta see it all before you come down...
You got the money, but the money is wasted
You got the dealers, so now you don't fake it
I'll be there when you're running around
You gotta see it all before it comes down
You got the money, but the money is wasted
You got the dealers, so now you don't fake it
I'll be there when you're running around
You gotta see it all before it comes down
You gotta see it all before it comes down

You gotta see it all before it comes down
You gotta see it all before it comes down
You gotta see it all before it comes down
