Future of the World

Praying Mantis

There's a dream that I have on my mind
And it's becoming very clear
It's a dream so very hard to hide
No more sorrow no more fear

Take away the evil from our world
Take away these troubled times
Take the madness and keep love alive
Peace on Earth for all mankind

People walk without a care
Children laughing everywhere
Dreaming 'bout the future of the world

Break the chains that hold you down
Cries of freedom all around
Dreaming 'bout the future of the world

We must fight to keep this dream alive
We must show them all the way
Come together and we will survive
Lead them to another day

The light shining down on me
It gives me strength to carry on
We are the future now it's plain to see
We can change the right from wrong

No more hiding in this world today
No more anger no more tears
There must be a better way for us
For our children's coming years

Take away the evil from our world
Take away these troubled times
Take the madness and keep love alive
Peace on Earth for all mankind
