Keep It Together

Brooklyn Funk Essentials

There?s so much left to say, before you walk away from me.
And you know that I would get down on my knees and pray to God.
And you know that I will try, and you know that I would die for you.
And you know that I would take a bullet just to save your life.
Just to save your life.
Just to save your life.
It?s hard to turn back down.
It?s hard to say goodbye.
Chorus:
Cause even though, we are miles apart tonight.
I know we can make it right
So just give it a chance, and we can keep it together
Cause even though, we are miles apart tonight.
I know we can make it right
So just give it a chance, and we can keep it together
And everytime I think of you
After all that we?ve been through
Cause no one ever, no one ever ever compares to you
And my mind is spinning in circles
And my thoughts are running wild
And you know that I would take a bullet just to save your life
Just to save your life
Just to save your life
It?s hard to turn back time
It?s hard to say goodbye
Chorus:

Cause even though, we are miles apart tonight.
I know we can make it right
So just give it a chance, and we can keep it together
Cause even though, we are miles apart tonight.
I know we can make it right
So just give it a chance, and we can keep it together
We can keep it together yeah
We can keep it together yeah
So just hold on tight, never let me go this time
Never let me
Even though we are miles apart tonight
I know we can make it right

So just give it a chance.
even though, we are miles apart tonight.
I know we can make it right
So just give it a chance, and we can keep it together
Cause even though, we are miles apart tonight.
I know we can make it right
So just give it a chance, and we can keep it together yeah
Just hold on tight, and don?t let go
We can make it if we just hold on
Just hold on tight, and don?t let go
We can make it if we just hold on
If we can keep it together yeah
If we can keep it together yeahh..oh
So just hold on tight
Never let me go this time
Never let me go.
