

# Never Come Back

## No Justice

Bet you didn't think I heard you  
You're always talking all the damn time  
About the things you had to go through  
I tuned you out drinking my cheap wine You're always looking for a hand me down  
You never did think to pass it around  
You're looking for redemption  
Oh and slowly burnin out Chorus:  
I don't care what you do what your name is  
You don't impress me with the money you have  
And on the inside you're carrying a heartache  
You're all alone and you can never come back Where you from and whats your name son  
I need to know again tonight  
But I never get an answer  
I'll rock and roll or we can talk all night Tied down by the trip wire  
And nobodys by my side  
They know I'm running on empty  
And time is passing me by Repeat Chorus Guess you didn't know by now that I'm not like you  
You didn't pick up the pieces, after everything broke in two Repeat Chorus
