

# A Farewell To Arms

## Machine Head

Can you hear their cries?  
Nowhere the children run to hide  
Crimson rivers flow down hills, atone our ills  
And woe to all her songs of love  
A farewell to arms  
Mutilated lives blackening as coffin line the sides  
Filled with fathers  
Who has won when only sons  
Who hold their grieving heads and mourn  
A farewell to arms  
Always our souls entwined  
Erase this vast divide  
Deaf ears our voices rest  
Tyrant, this is protest  
Who has won?  
Yes, who has won?  
I'll wave this flag of white  
So the avenged see the light  
We'll pay for closed eyes  
Before genocide  
Pissing the masquerade  
March to death parade  
Trade not humanity  
For pearls of the slavery  
In the depth of mind the heart will find  
The truth of our leaders  
We'll try the facts so through the cracks  
May fall the lying cheater  
Who has won when we're all dead?  
I'll wave this flag of white  
So the avenged see the light  
We'll pay for closed eyes  
Before genocide  
So is this how we live?  
Or is this how we die?  
Black blood dripping from platinum fangs  
Rich blood flees while  
Our poverty hangs, oh  
Oh, shepherds, they herd the mindless trance  
As the flock follows the puppet's dance  
In a fatal romance  
Oh, all that they needed was  
A pretext, war's next  
Heads to the chopping blocks  
And our necks are next  
For those who died  
Who fought for our rights  
Whose children now slaves  
They're turning in their graves  
Oh, war hawks and senators  
They sit right so trite  
Never their sons will know  
What it's like to fight  
Soldiers are dead  
And children have bled  
And the silence is numb

What have we become?What have we become?

What have we become?

What have we become?

God save usA farewell to arms
