

Never Never

Lil Cuete

Verse

I hope you get this in a hurry and I'm sendin' it early to let you know that daddy's thinkin' about you don't worry, I know you're hurtin' you miss me like I miss you let them try to keep us apart but we all know it's true you're just perfect for me and I'm perfect for you they have no kind of idea about the pain we go through, it's like I dream about you every night and still ain't enough I reach out to give you a hug and a ??? when you wake up , I feel I've lost too much time and now I can't get it back I'll do anything to keep you even give up my rap you're my light in the dark I can't see nothing on this pitch like you're stayin' in my heart and it's always will be like that

Chorus

We'll never never let em tear us apart(X4)

Just think of me when you're scared in the dark you know ain't no one's gonna tear us apart(X2)

Verse

I never meant for this to happen and I wish it was better me and your mom both love you we just can't be together but every time I think about it I get real real mad why would she hurt you just to hurt me if it makes you sad ,and you need reasons I got plenty your daddy's no dummy I'd die before ?? somebody takes you from me I miss huggin' you and kissin' you and sayin' I love you no matter what the situation is I'll always think of you when it's a struggle but I gotta keep my head above water everybody around me knows I'm in love with my daughters I keep on countin' the days until I see you again but just remember that I love you and I'm here to the end.. so tell em

Chorus

We'll never never let em tear us apart(X4)

Just think of me when you're scared in the dark you know ain't no one's gonna tear us apart(X2)

Yeah that's right no one's ever gonna tear us apart , daddy's always here for you no matter how close no matter how far , I love you so much whenever you need me I'll be right there and you know what? You tell em this you tell em

We'll never never let em tear us apart(X4)

Just think of me when you're scared in the dark you know ain't no one's gonna tear us apart(X2)
