

Can't Feel My Face

Islands

I miss my wife
I miss my best friend
Every night I miss my home
I miss my own bed
And my old life Ooh x4 I lost my love
It brought me so low
As described above I lose desire
Into my mood swings
Into the fire Ooh x4 I can feel my face (echo) x2
I don't want to know where the feeling goes to some better place
I can feel my face (echo) x2
I don't want to know where the feeling goes to some better place
I don't want to know where the feeling goes to some better place Ooh x4 I miss my wife
I miss my best friend
Every night I miss my home
I miss my own bed
And my old life
