

Don't Forget to Breathe

Zorita

Bury your nails under my skin
And brand me with desire
But don't forget to breathe
Don't forget to breathe Lead me with your rhythm
Lure me with your hiss
Let's dance in the heat
But don't forget to breathe And as we dive, into the deep
There's only you, there's only me
First we retain, and then we release
And in between, Don't forget to breathe The air is getting thin
As we slowly vaporize
Leave the ground beneath
Don't forget to breathe And as we dive, into the deep
There's only you, there's only me
First we retain, and then we release
And in between, and in between
I can hear your silent cry
I see the begging in your eyes
And as the steam slides through your teeth..Don't forget to breathe
