Brain Candy

Under The Weather

Soaked in logic I'm sick and lethargic
My face is bloody and my eyes get fuzzy
when I wake up at nightWho are you? To bring me gloomI am under the weather under the stars
looking for heaven from inside a capsule
white and blue's my favorite thing to doI'll fast for seven days just to pass the time away
I'm sick and tired of being tired and sick
I'd stop but I already quit
