

# Until I Die Alone

## Never Shout Never

Waking up last night  
I saw it in your eyes  
You're afraid  
That you will die alone So I just told the truth  
My tongue tied and unloose  
This will sink your ship  
Then you will be set free I have thought so many times  
What my life would be like  
Without you  
There right by my side  
What my life would be like  
Without you You sure seemed alarmed  
When I spoke my heavy heart  
How could I say something  
As hopeless as that sounds So I just used my mind  
My words were hard to find  
This will hurt so bad  
Then it will go away I have thought so many times  
What my life would be like  
Without you  
There right by my side  
What my life would be like  
Without you Then to make things worse  
I questioned my own words  
What will life be like  
If she is really more So I just took my time  
And when I sober up my mind  
It will be alright  
And we will be just fine I have thought so many times  
What my life would be like  
Without you  
There right by my side  
What my life would be like  
Without you Waking up last night  
I saw it in your eyes  
That sparkle of your soul  
That I had missed So I just told the truth  
My tongue feeling quite loose  
You're the one I want

Until I die aloneI have thought so many times  
What my life would be like  
Without you  
There right by my side  
What my life would be like  
Without you
