Enough

GENTRI

Enough

I wake to face the day, already buried under.
The noise that never fades, ooooooooo.
There's never enough time to keep up, but fade

Far from all the madness you call to me
and offer a moment I've longed for.
You wash away the sadness when you're with me
Forever is not enough.

I race to beat the clock
A thousand things to conquer.
And when I get so lost oooooo .
You send me your love before I give up and then,

Far from all the madness you call to me,
and offer a moment I've longed for.
You wash away the sadness when you're with me.
forever is not enough.

Closer and closer where time stands still.
I'll lead you safely forward.

Far from all the madness you call to me,
and offer a moment I've longed for.
You wash away the sadness when you're with me,
Forever is not enough

Forever is not enough.
