# For You

## Save Ferris

I never told you how to live your life
I never said you had to be something you don't want to be
I never said you had to stick around forever
Never said you had to stick around to be with me
[chorus]:
I ain't going to be responsible
When your life don't end up full
All your talk has become bull
Just what do you see
Don't place the blame on me
A lack of vision when you made your decision

And you wonder why your life has turned out this way
You tried to use me and succeeded to confuse me
But now you're feeling sorry 'cause you got played
(repeat chorus)
Life is evil when you don't get what you want
Memories can serve as ghosts
They'll tease and haunt you
When you spend your nights up late
Wondering all about your fate
Why did life end up this way
For you
