

# July

## Slo Burn

So play your dead an all time rhyme  
The heats on you& can you stand  
The flowers dead, all in your head  
You are my wave, you cannot save July July We can try to erase the pain it's all time high  
And I'll cry to the flag train we ignore that sigh  
In the thick of the solid flame i can wash that pain aside  
And when dawn would end the same I found the ride of rides  
July July July July  
You want it, You need it, You steal it, kill just to be there  
Now revealed by the hope of a stray  
It's a played out scene  
Under circles of black you'll say  
Is this all I'll see?  
As the contrast fades to grey  
Solid heat will burn and clean  
So the end of the ride is today  
Well, I'll fold this hand cause it's ...July July July July  
You want it, you need it, you steal it, kill just to be there
