

# Lamb

## Skid Row

I have been here for so long  
I've carried all the weight  
'til something pulls me underneath the tide  
Climb to where the air is thin  
so I can breathe again  
Still it makes me wonder deep inside  
Nothing's free  
We're all machines  
No one bleeds  
Shadows of you sins are following you

When it sucks you in, it's swallowing you  
King of the mountain, that's what I am  
Space between the world and me  
Everybody's someone else's sacrificial lamb  
defying gravity  
Drink the chemicals we spill  
'til something pulls me closer to the ground  
While hell is freezing over, over  
Our eye is on the kill
