Giants

54-40

Everything is easier, when all you do is laugh
You never get confused if you never understand
And if they're not giants, they're not giants, there's no giants to fall
If their not giants, there's never giants, they must be windmills after allI can see you want it, I can see you want it
I can see you need it, I can see you need it
I can see you want it, need it, like it, love it
Over and over againThey say we're only given so many breaths
And it's in and out as we spin around
Which way we go it doesn't matter
Which way we see and it's all my fault'Cause I'm going down the river will you hold me
I can't step in the same water twiceThere is neither good or bad, but over thinking makes it that
Oh my God, if now we couldn't changeI know, I know when you get scared
I know it happens everywhere
I know, I know when you get scared at nightThere is neither good or bad, but over thinking makes it that
Oh my God, if now we couldn't change
You and I, we had a friend, took a spin and then fell back
Oh my God, if now we couldn't changeChange, change, change
