

Light Is Faster than Sound

[Janis Joplin](#)

Light is faster than sound
My head to the ground
Mind going round
Faster than sound What goes up must go down
World goes around
Sun shines around
Faster than sound Suddenly I see your face
(Faster than sound)
Through the emptiness of space
(Faster than sound)
You're turning my mind all around
(Faster than sound)
'Cause life is faster than sound
(Faster than sound) Light is faster than sound
My head to the ground
Mind going round
Faster than sound What goes up must go down
World goes around
Sun shines around
Faster than sound Whoa, suddenly I see your face
(Faster than sound)
Through the emptiness of space
(Faster than sound)
You're turning my mind all around
(Faster than sound)
'Cause life is faster than sound
(Faster than sound)
