Robots

October Drift

The strength of your grip increases
The crack of your whip releases me (releases me)
Sun shines in lonely places
(???) in open spaces

I know I'm missing something pure
And that its just behind the door

Keep me up when I wanna go down
Keep me up when I wanna be found
Speed me up when I gotta slow down
Pick me up now
Pick me up again

The buzz of the world relaxes
Slows down upon its axis too (its axis too)
Light dies into the night time
(???)

I know I'm missing something pure
And that its just behind the door

Keep me up when I wanna go down
Keep me up when I wanna be found
Speed me up when I gotta slow down
Pick me up now
Pick me up again

Radio takes me back
15 years 3 times over
I'm driving on my own
15 years and 3 months older
I sink back into my seat
13 hours on my feet
I don't want to waste your time
I'm looking after mine
