First Time for Everything

Five Times August

Im standing in the place we met
Heart shakes, and then I sweat
Its so hard to see that its all overWhat did I do to make this end?
And could I really be your friend?
I can barely just pretend its overIm standing in the place we first kissed
Theres so much I miss
This I cant resist cause Im all over
Where we took our first photograph,
And where I first held your hand and laughed
Awkward moments like that have passed, its over(bridge)
Youre fine and I believe it
Im something you never needed
I cant say the same for you(chorus)
But theres a first time for everything
And Ill fall in love again
When I begin my second time around
Its the last time Ill think of you
You can do what youd like to do
But if you only knew Im never coming backIm standing in the place we first said goodbye
I dont know why, I so relied on you for my smile
I laid happiness in your hands
And I dont really understand
The cost was more than I could stand
It was miles wide(bridge)
(chorus)
(bridge)
(chorus x 2)
