

Invisible One

[Tanya Donelly](#)

Oh she's right in front of you
And a light year away
Her hair could be on fire
And you'd just ask her
How her day went She's an invisible one
You say, well some of us are
She may be an invisible one
But she didn't get there alone Oh it might take a little while
To recognize the view
Now that you're looking
Through her eyes
That toxic clown in the corner
Must be you She's an invisible one
You say, well some of us are
She may be an invisible one
But she didn't get there alone
Somebody helped her disappear
