

I Am Your Robot

Elton John

I've been beaming aboard her
For a light year, from a strange craft
She's got a subtle touch on the silver key
To a clockwork heart
I am your robot, I am your robot
I am your robot man
I am your robot, I am your robot
I am your robot man
You went and flipped the switch
And turned me positive, when I was negative
I've been stumbling around like a metal man
On the graveyard shift
I am your robot, I am your robot
I am your robot man
I am your robot, I am your robot
I am your robot man
I am your robot, I am your robot
I am your robot man
I am your robot, I am your robot
I am your robot man
I am your robot
And I'm programmed to love you
My serial number is 44357
I am your robot, I am your robot
I am your robot, I am your robot
I am your robot, I am your robot
I am your robot
I am your robot
I am your robot, robot, robot, robot
I am your robot, robot, robot, robot
I am your robot, I am your robot
