Secret Agent

Secret Society

Well, I've got friends in the States
And I've got friends out in space
When information's your game
The whole world knows your nameAnd so they gave me a code
To work this treacherous road
For all the agents I know
Must work incognitoI love my trade
I've got my future made
I put my life on the line
To save this country of mine
And they reward me with love
And see I have a good timeSo all my moves must be fast
'Cause every day is my last
A secret agent that's slow
Almost certain to goI've got friends in the States
I've got friends out in space
When information's your game
The whole world knows your nameAnd so they gave me a code
To work this treacherous road
For all the agents I know
Must work incognito
