

# Mosquito

## La gripe

You like when we go fast  
So my foot's on the brake, used to be my girl  
But now you're just my worst mistake  
You don't see it, not a subtle change  
Makes me laugh, you turned into a cliché  
Every time you told me  
That we'd never say goodbye, was a lie  
You knew what to expect from me  
Just like a hit of ecstasy  
You made me high  
You think I still want you  
After all you put me through  
You think I can't walk away  
And find someone better for me  
Just take your overactive ego  
Shrink it down like a mosquito  
Baby, lovin' you was such a chore 'til I got bored

Now I don't think about you anymore  
From the first time I saw you naked  
I could see the future  
I knew that my world was shaken  
Lost my innocence then I lost my mind  
Thank God now I see  
'Cause with you I must have been blind 'cause  
Every time you told me  
That we'd never say goodbye, was a lie  
Just like a common criminal  
You gave me just the minimal to  
Keep me hanging on inside  
Now that I can breathe, I'm done with therapy  
It's your turn to burn, covered up in lies  
And still so full of pride, I hope you choke  
'Cause it's the sex I'll miss the most
